2013-2014 GT500 SUPER SNAKE

Building on the "most powerful engine ever produced in an American vehicle" and Voted as one of the "Sexiest Cars" at the New York International Auto Show, the Shelby GT500 Super Snake fills your greatest desire for more power. With power levels up to 850 HP customers have been buckling up for the ride of their life since 2007.

"The 2013 Super Snake is one of the most amazing Mustangs we have tested and it is the quickest and fastest Mustang we have tested to date. It makes every bit of the advertised 850 horsepower, and we put it to the test on track... We ran a best of 10.66 at 137 mph with only a sap to Nitto NT555R tires. With a drag race setup it would likely go in the 9s, yet it maintains all the comfort and features of any new Shelby."

Evan Smith, Muscle Mustangs & Fast Fords, June 2013

Also available for 2007-2012 GT500

662 HP Available From \$28,995

850 HP Available From \$41,500
